What is Pivvot Vision Framing?

RunFree.Co's signature service reimagines Vision Framing for authentic, disciple-making church growth. For over two decades, Will Mancini and his team have guided churches in articulating their unique vision through the celebrated Vision Frame tool. Now, we've revolutionized this process to address the critical paradigm shift needed in today's church landscape.

Pivvot's Visual Road Map with Six Master Tools

The Pivvot Vision Framing process integrates four transformative “paradigm steps” to accelerate the needed shifts you’re already talking about. You probably don’t need just another voice. You need a coach to help complete the conversation and weave it into our proven Vision Framing approach:

1. **Move the Finish Line** (Mind Shift): Redefine success with the Funnel Fusion tool to lead beyond attendance and program participation to normalizing relational disciple-making.
2. **Become a Hero-Maker** (Heart Shift): As a leadership team, embrace the "pastorhood of every believer" and use the Crowd Cloud tool to fully see your congregation's potential.
3. **Build a Training Center** (Hands Shift): Use the Disciple's Journey tool to pivot from content-focused teaching to practice-based training, equipping disciples with the specific skills Jesus modeled.
4. **Empower Each One** (Platform Shift): Help individuals identify and step into their unique kingdom calling with the Kingdom Platform tool.
5. **Design Your Ministry**: Codify your unique disciple-making mission and model using the Vision Frame tool to communicate and deliver it.
6. **Create the Future**: Clarify a God-sized dream for the future with the Horizon Storyline tool, which integrates a simple executable plan to rally every leader.

Why the Pivvot Vision Framing co::Lab?

Through our virtual cohort approach, video training and digital portal you and your team will:

- Challenge assumptions about current church growth models
- Transition from program-centric to people-development focus
- Develop strategies to equip and release disciple-makers
- Craft a visionary plan with unprecendeted clarity
- Learn to measure success by disciple-making impact, not just attendance

The Vision Frame has served 40,000 church teams. Now, the Pivvot Process takes it further - helping you articulate a truly disciple-making vision unique to your context. Built on years of research, practical experience, and Biblical wisdom you will confidently:

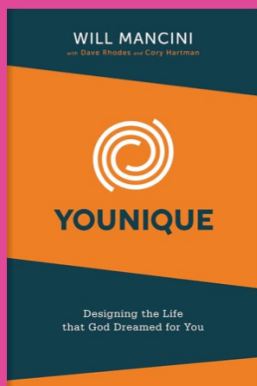

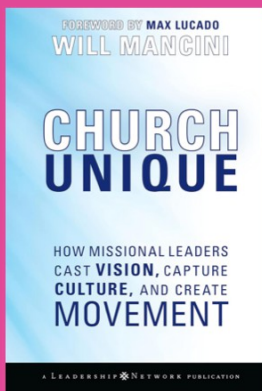

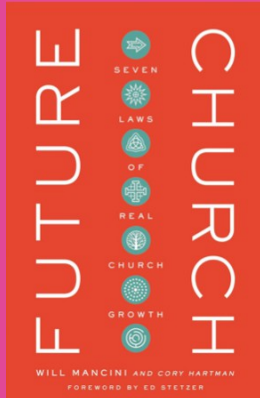

1. **Clarify your church's unique identity and calling**
2. **Develop a compelling, actionable vision**
3. **Create a roadmap for sustainable disciple-making growth**
4. **Align your team around a shared purpose**
5. **Implement effective strategies for ministry in a post-COVID context**

The Pivvot Vision Framing co::Lab isn't about abandoning everything.

It's about realigning your church's vision, strategy, and culture with Jesus' original disciple-making mission. It's about creating a sustainable model for growth that doesn't chase numbers or rely on constant programming.

RunFree.Co's Proven Thought Leadership

Our approach draws from the groundbreaking concepts introduced in "Future Church," which outlines seven laws for real church growth and introduces the Funnel Fusion tool. We also incorporate insights from "Church Unique," helping you articulate your church's DNA through the Vision Frame tool. The Horizon Storyline tool from "God Dreams" empowers you to inspire your team and focus them around a vivid picture of your church's next big dream. Finally, "Younique" provides the training for personal calling, which activates the "multiplication funnel" - the pattern of how Jesus modeled disciple-making. This comprehensive approach ensures that your church's growth strategy is aligned from the individual believer to the overall church vision.

As a RunFree.Co client, you will have unlimited digital access to these books for use with your team during the coaching year.

Pivvot Vision Framing co::Lab

Pivvot Vision Framing co::Lab is built on the “Funnel Fusion Approach” outlined in Will Mancini’s book Future Church. It is an innovative journey that delivers solutions for real disciple-making growth based on your church’s unique DNA. The deliverables include a Vision Frame and Horizon Storyline as ministry design and visionary planning tools that have been celebrated by the church around the globe for over a decade.

The journey is built around a collaborative training and decision-making environment based not only on Future Church but also the integrated tools from the books Church Unique, God Dreams, and Younique. We will facilitate a team- building and coaching dynamic to help the Future Team align around Vision Frame articulation, growth challenge clarification, and disciple-making culture and implementation. It’s best to view this not as a typical consulting project but as a fractional staff person serving as a strategic development executive pastor for one year at a time.

CORE PROCESS

The entire process consists of 10 core virtual training sessions, 4-hours each spread out over 10 months.

- The sessions are attended by up to 4 church leaders from each church all via Zoom
- co::Labs consists of up to 8 church teams
- Churches should plan on at least 4-6 hours between sessions for continued collaboration and decision-making
- Sessions will be led by Andrew Estes and Will Mancini
- Each participant will have access to a digital portal with handouts, additional training videos, and book resources
- Participants will interact in an online community between sessions for further coaching, Q&A, and feedback
